

Founded in 1847, El Puerto de Liverpool (EPL), S.A.B. de C.V. has been part of Mexican life for over **178 years** and seeks to continue contributing to a more sustainable world for present and future generations. That is why we are proud to announce that, as of the end of **2024**, we have **13 locations** with **Environmental Certification** issued by government entities such as the Ministry of the Environment of Mexico City and the **Environmental Protection Agency of the State of Tlaxcala**.

The certification programs from these agencies aim to enhance the environmental performance of our locations in order to protect natural resources and the environment, ensuring compliance with current environmental legislation. This is achieved through a methodological evaluation conducted by third parties on our activities, operations, and processes.

As a result, we have a total of **553,231.45 m²** certified as meeting the highest environmental standards required by the Authorities. This allows us to promote improvements across various environmental areas, such as reducing atmospheric emissions, decreasing potable water consumption, and encouraging waste recycling at our locations—demanding us to operate more efficiently every day.

The actions we take are aligned with our Sustainability Strategy, which aims to leave a lasting mark on each of us.
